DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 3/9/10 have been fully considered but they are not persuasive. The applicant asserts that prior Thomas fails to disclose any mention of amplification of a signal level. The examiner asserts that the weighting of each signal reads on the amplification language.
2. Applicant's arguments, regarding the selectively attenuate and selectively amplify, filed 3/9/2010, with respect to the rejection(s) of claim(s) 12-25 under 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of new matter rejection.
3. Regarding claim 17, the applicant has traversed the official notice statement. The traversal is noted. The examiner cites Elko (US 6,041,127) ; column 6, line 64- column 7, line 4 as validation of the official notice asserted in the previous rejection.
4. Claims 1-11 are cancelled.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 12-25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to

one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 12 and 2 recite "...to selectively attenuate and selectively amplify the signal level of each transmitter device...". The specification teaches of selectively deactivating the transmitting devices, it does not teach of selectively attenuating and selectively amplifying the signal level of each transmitter device as claimed (See page 2, lines 16-20 and page 4, lines 1-4).

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
